Trinity Bellwoods Town + Homes

{ Design Cecconi Simone Inc. Designer Elaine Cecconi, Cecconi
Simone Inc. Location Toronto, Canada Built Area 89m²
Completion 2013 Photographer Joy von Tiedemann }

{ Trinity Bellwoods Town + Homes showcases contemporary interior design, imparting a progressive brand identity to this urban-infill project in a market segment crowded with retrograde developments.

Cecconi Simone conceived the interiors and custom fixtures for the three unit types within the community - 4.1 meter-wide, 4.6 meter-wide and 5.8 meter-wide. The ground level and third floor of the 4.6 meter unit are represented in this model, in a clean palette of white, black, walnut and yellow. Custom millwork, with alternating closed and open storage, spans the full length of the ground level, generating a continuous, horizontal composition of solids and voids. The stair, kitchen island tower and integrated exhaust hood introduce modulating elements of verticality. Subtle millwork details in the kitchen include zero-edge Corian counters, a slotted shelf for standing dishes, back-painted seamless backsplash and integrated appliances. A built-in bench in the dining area is complemented by an integrated ledge in the living area, both with storage below.

The master suite features a custom walnut-laminate sleep unit, incorporating a bed, side tables, sofa and display niches with LEDs. The ensuite contains a specially-designed vanity with integrated white Corian sinks, counter and backsplash and open and closed storage cabinets in white and walnut laminate. Custom wall-mounted medicine cabinets are accessed via a pivoting mirror. }
